Dear Friends,

This December, the Prevent Cancer Foundation® is celebrating 35 years of saving lives across all populations through cancer prevention and early detection. When we started this organization in 1985, we never could have dreamed of the progress we have made together.

But if this year has reminded us of anything, it is that our health and safety are of utmost importance. They are the most priceless things we have. And cancer doesn't pause for anything—even as a parallel health crisis rages around the world.

We need to remain steadfast in pursuit of cancer prevention and early detection to save lives. That's why we are looking ahead to our 50th anniversary and to what we can accomplish—together—in the next 15 years.

You can learn more about our bold vision for the future on page 30. Together, we are imagining a world where no one dies of cancer.

Thank you for daring to imagine this world with us.

Sincerely,

Carolyn Aldigé

Carolyn R. Aldigé

Gary R. Lytle
Chairman of the Board

Time to get screenings Back on the Books

When the coronavirus pandemic reached the U.S., many lives were put on pause. Along with postponed vacations, rescheduled weddings or cancelled graduations, something even more important was being missed by thousands—routine cancer screenings and critical vaccinations.

In the early days of the pandemic, the Prevent Cancer Foundation realized we would be facing a downstream effect of missed or late-stage cancer diagnoses. Once restrictions lifted, we launched “Back on the Books” to encourage people to get their routine cancer screening appointments rescheduled as quickly as possible.

What you can do: If you are due (or overdue) for a mammogram, Pap test, lung cancer screening, colorectal cancer screening, PSA test, skin check or dental appointment, get your appointment Back on the Books. Routine cancer screening detects cancer early and increases the likelihood your treatment will be successful. Health care providers are working hard to ensure everyone remains safe during their appointments. Call your doctor’s office and ask what steps they are taking to limit your risk of exposure to COVID-19.

And don't forget the kids! It is especially important to make sure your kids' medical appointments are continuing and they are staying on track for vaccinations to keep them safe from preventable (and dangerous) diseases and illnesses. For boys and girls ages 11-12, this includes the human papillomavirus (HPV) vaccine. This vaccine protects against a virus that can cause at least six types of cancer.

Need more information? If you don't know what screenings you're due for, are wondering what safety precautions to ask about or are concerned about insurance coverage for screening services, visit [preventcancer.org/backonthebooks](https://www.preventcancer.org/backonthebooks).

People 'afraid to go to doctors': A third of Americans miss cancer screenings, survey suggests

July 28, 2020
USA Today

Don't Let Covid-19 Delay Your Own Cancer Screening

October 25, 2020
Wall Street Journal

Featured on: ABC, CBS, Fox, NBC

Our Findings

In May 2020, we conducted a survey to find out how many appointments were being missed and why. This data has informed the Back on the Books campaign, enabling us to speak to the heart of why people are postponing or missing their appointments—and how we can help them.

- 35% of American adults had a cancer screening scheduled during the pandemic and missed it.
- 44% of those who missed appointments plan to contact the doctor's office to reschedule.
- 24% expect their doctor's office to contact them.
- 22% of people who have routine medical appointments or screenings scheduled in the next 3 months plan to postpone or cancel.

The Prevent Cancer Foundation is conducting these surveys on a quarterly basis to respond to attitudes and behaviors regarding cancer screenings and COVID-19.

Stay Skin Healthy

These skinfluencers want you to Stay Skin Healthy

Stay Skin Healthy: Last summer, the Prevent Cancer Foundation launched Stay Skin Healthy, a new, empowering campaign designed to introduce a younger audience to the power of cancer prevention.

The campaign focuses on meeting the millennial audience where they are—and keeping them in the loop on how to stay skin healthy and reduce the risk of skin cancer. By using social media influencers to deliver key campaign messages, the Foundation is engaging young adults and sharing education and screening information for all cancer types to ensure this generation can Stop Cancer Before It Starts!®

Follow our ‘skinfluencers’ on social media!

Research grantees

With your help, the Prevent Cancer Foundation supports research grants and fellowships for cancer prevention and early detection. The application process is competitive, and proposals are assessed through an external peer review. Our focus is on early-career researchers and high-risk, high-reward projects.

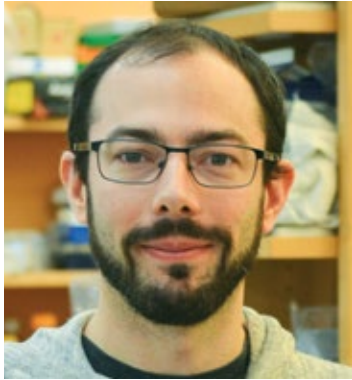

Grantee: Alicia Allen, Ph.D.
Named Award: Awesome Games Done Quick
Institution: University of Arizona, Tucson, AZ
Project Title: A Novel Approach to Help Women of Reproductive Age Quit Smoking

Grantee: Francisco Cartujano, M.D.
Institution: University of Rochester School of Medicine & Dentistry, Rochester, NY
Project Title: Advancing Smoking Cessation in Latinos Living With HIV One Text at a Time

Grantee: Jan Claesen, Ph.D.
Institution: Cleveland Clinic Foundation, Cleveland, OH
Project Title: Gut Microbiota Metabolism of Dietary Compounds to Chemopreventive Molecules

Fellow: Adrien Grimont, Ph.D.
Named Award: Marcia and Frank Carlucci Charitable Foundation
Institution: Joan & Sanford I. Weill Medical College of Cornell University, New York, NY
Project Title: Mutant KRAS Allele-Specific Epigenetic Plasticity in PDAC Initiation
 Suzanne Hafiz, MPHE, CHES
 Illinois

Grantee: Artit Jirapatnakul, Ph.D.
Named Award: The Shure Family Charitable Foundation
Institution: Icahn School of Medicine at Mount Sinai, New York, NY
Project Title: Modeling Nodule Measurement Uncertainty Using Quantitative CT Features

Fellow: Lilianna Phan, Ph.D.
Named Award: Richard C. Devereaux Outstanding Young Investigator Award
Institution: Georgetown University, Washington, D.C.
Project Title: Optimizing Risk Communication About JUUL Use for Young Adults

Grantee: Jordana Phillips, M.D.
Named Award: Awesome Games Done Quick
Institution: Beth Israel Deaconess/Harvard Medical Center, Boston, MA
Project Title: Contrast Enhanced Mammography for Women with a History of Breast Cancer

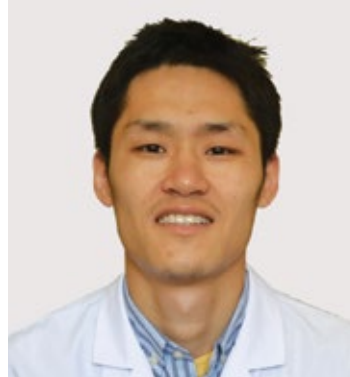

Grantee: Amir Zarrinpar, Ph.D., M.D.
Institution: University of California San Diego, La Jolla, CA
Project Title: Microbial DNA as a Diagnostic Marker for Hepatocellular Carcinoma

Technical Fellowships

Since 2016, the Prevent Cancer Foundation has partnered with the Union for International Cancer Control (UICC) to fund Technical Fellowships, promoting the rapid transfer of knowledge and innovative technology in cancer prevention and early detection, primarily in low- and middle-income countries.

To date, we have funded 38 of these grants. Though the COVID-19 pandemic has impacted the usual fellowship process, we are excited to fund the three promising fellows pictured here, as well as an additional class of fellows in the coming year.

Dr. Anarkhuu Bold-Erdene
National Cancer Center of
Mongolia; Mongolia
Host institution:
BC Cancer; Canada

Dr. Rana Chanchal
King George's Medical
University; India
Host institution: University of
Nottingham; United Kingdom

Dr. Damigou Mawuli Sambiani
Hôpital Aristide Le Dantec,

Niger; Niger

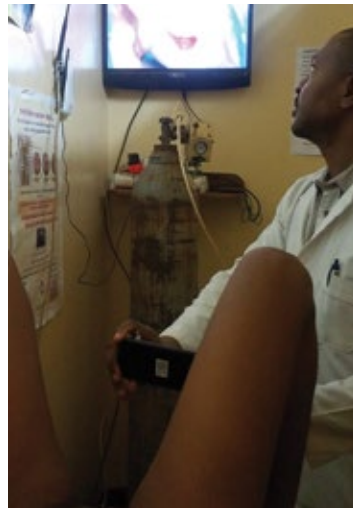

2020 Global Grants

The following organizations were each awarded a one-year, \$75,000 grant.

Organization: Cameroon Baptist Convention Health Services
Title: Cervical Cancer Prevention among Female Sex Workers in Urban Cities in Cameroon
Location of Project: Cameroon

Cervical cancer is the leading cause of cancer morbidity and mortality in women in developing countries like Cameroon. This project will provide education, screening and treatment to female sex workers, who are vulnerable to cervical cancer and who are not likely to seek screening.

Organization: Duke University
Title: HOPE: Women Empowering Women to Adopt New Technologies for Cervical Cancer Screening
Location of Project: Peru

The project will implement an innovative model of health care delivery that is community-based, relying on women empowering women to be active agents of change in their own health care. This model gives women privacy and agency over cervical cancer screening, allowing 98 out of every 100 women to complete care at home.

Organization: Memorial Sloan Kettering Cancer Center
Title: The Efficacy and Feasibility of Fecal Immunochemistry for Colorectal Cancer Screening in Nigeria
Location of Project: Nigeria

Colorectal cancer rates in Africa are rising, but there are limited data to guide screening in the region. This project will examine the accuracy and feasibility of a commonly used, inexpensive stool-based screening test as a vital step toward developing colorectal cancer screening programs in Africa.

“Colorectal cancer is a major problem in Nigeria. This grant will allow us to fill in a major gap in knowledge for colorectal cancer screening.”

— Dr. Isaac Alatise, Nigeria

Organization: Rice University
Title: Point-of-Care Isothermal HPV DNA Amplification Test for Cervical Cancer Screening in Mozambique
Location of Project: Mozambique

Cervical cancer screening remains a challenge in resource-limited settings. The project team is developing and evaluating a new cervical cancer screening test that has the potential to be low-cost and high-performance, compared with existing technologies.

“The HPV test being developed at Rice University has the potential to significantly increase access to cervical cancer screening in Mozambique. The test is designed for use at the point-of-care, to be user-friendly, and to be inexpensive. The team has made great strides toward validating the test and gaining feedback from our Mozambican collaborators to be sure it is appropriate for use in this context. I see a great need for this test in our cervical cancer screening program in Mozambique.”

— Dr. Kathleen Schmeler,
The University of Texas MD
Anderson Cancer Center

2020 Community Grants

“Thanks so much to the Prevent Cancer Foundation for its incredible support of the ScanVan as it returns to our most-vulnerable communities, overcoming the many barriers presented by this pandemic and providing comprehensive breast health care to those who need it most,” said Erika Hval, Senior Grants Manager for Project Renewal, Inc., located in New York City.

Since 2007, the Prevent Cancer Foundation has awarded 91 grants to projects in a multitude of states and territories, as well as to organizations serving Indian Country. Here are the Foundation’s 2020 community grant recipients.

**American Indian Cancer Foundation (AICAF)
Minneapolis, Minn.**

Increasing colorectal awareness and screening at three American Indian urban health clinics

**Binaytara Foundation
Issaquah, Wash.**

Providing cervical and breast cancer education, screening and navigation support to 300 Bhutanese refugee women

**Kintegra Health
Gastonia, N.C.**

Coordinating breast cancer screening, diagnostic testing and navigation for 250 uninsured/underinsured women

**Korean Community Services of Metropolitan New York, Inc.
Bayside, N.Y.**

Hepatitis B testing, education and care coordination for uninsured or underinsured community members

**North East Medical Services
San Francisco, Calif.**

Providing comprehensive multidisciplinary care to women with chronic hepatitis B virus infection and their infants

**Project Renewal, Inc.
New York, N.Y.**

Providing free comprehensive breast cancer screening and education on board the ScanVan mobile mammography facility and bilingual patient navigation for 1,100 underserved women

**Roswell Park Comprehensive Cancer Center
Buffalo, N.Y.**

Increasing knowledge and reducing barriers to lung cancer screening among underserved communities

**Tampa Family Health Centers, Inc.
Tampa, Fla.**

Increasing colorectal cancer screening among an underserved patient population and establishing regular provider training and education about screening

**The Research Foundation for SUNY on behalf of the University at Buffalo, The Jacobs School of Medicine and Biomedical Sciences, Department of Family Medicine and the Primary Care Research Institute.
Buffalo, N.Y.**

Partnering patient ambassadors with primary care providers to increase colorectal cancer screening among predominately Black patients

**VAX 2 STOP CANCER
Birmingham, Ala.**

Educating providers, parents and adolescents with evidence-based tools to increase HPV vaccination completion rates

Impact Spotlight: Health Care for the Homeless 2019 community grantee

On any given night in Baltimore, Md., nearly 3,000 people experience homelessness. People experiencing homelessness have a higher cancer risk, and due to lack of access to health care, often do not have a diagnosis until advanced stages.

Health Care for the Homeless partners with caregivers, advocates and donors to provide comprehensive health care and support services to people experiencing homelessness.

“If I hadn’t gone to the clinic, I never would have found out that I had cancer. Being able to see them every week saved my life. Now, I’m learning to love myself—and [learning] that I have something to live for.”

— Richard Holmes, cancer survivor

A community grant from the Prevent Cancer Foundation enabled improved access to colorectal and cervical cancer education and screening for the thousands of people without homes in Baltimore. Education and screening are now part of standard care at clinic sites and screening kits are readily available. These simple strategies, combined with targeted outreach calls to people due for a screening, have increased the rates of both cervical and colorectal cancer screening over the last year, helping dozens to detect cancer early and increase the odds of a successful outcome.

“Cancer prevention is important for everyone, but for our client population we know there are significant health disparities and much less access to cancer education and screenings. Many of these barriers we have to address at a systemic level, but by screening early, educating early, we are saving lives. Early detection leads to better outcomes,” said Lead Population Nurse Tracy Russell.

“With your support, we have successfully made cancer prevention education and colorectal/cervical cancer screening a higher clinical priority, including screenings in our regular workflows and targeted outreach to people due for screenings.”

Health Care for the Homeless provided more than 800 cervical and colorectal screenings with the support of their community grant.

Action for Cancer Awareness Awards

Since 1993, the Congressional Families Cancer Prevention Program's Action for Cancer Awareness Awards luncheon has honored congressional spouses, journalists and other advocates for using their platforms to educate the public on cancer prevention and early detection.

On September 26, 2019, a bipartisan, bicameral audience of congressional members and spouses, as well as leaders in the cancer community, gathered at the Library of Congress to celebrate the 27th annual awards and the 2019 honorees under the theme of "Prevention at Every Age."

**CONGRESSIONAL FAMILIES
CANCER PREVENTION PROGRAM®**
of the Prevent Cancer Foundation®

Congressional Families Leadership Award: Amanda Soto, spouse of Rep. Darren Soto (D-FL), and LeeAnn Johnson, spouse of Rep. Bill Johnson (R-Ohio)

Ms. Soto and Ms. Johnson are active members of the Program's Executive Council. Their activities include hosting educational and awareness events in their home districts.

Excellence in Cancer Awareness Award: Patrick Dempsey

Mr. Dempsey is an actor and producer, as well as the founder of The Dempsey Center, which provides free services and resources for patients, survivors, families and caregivers dealing with cancer.

The Congressional Families Cancer Prevention Program® works year-round to equip members and spouses—through educational seminars and webinars, events, and op-eds and social media posts—to take the message of cancer prevention and early detection back to their communities and constituents.

Prevent Cancer Health Fair and 5k Walk/Run— November 3, 2019

Just three days after the Washington Nationals' momentous World Series win, the Prevent Cancer Foundation took over Nationals stadium for the 11th annual Prevent Cancer Health Fair and 5k Walk/Run.

Breaking Records

Individual fundraising for #PreventCancer5k skyrocketed to **\$108,000**— a 260% increase from 2018!

Child's Play

Kids ages 0-12 showed up—and fundraised!—in full force.

19%
kids (0-12)

3%
teens (13-17)

77%
adults (18+)

Total Raised
\$245,412

and early detection

Awesome Games Done Quick

Much like the Prevent Cancer Foundation—born around a kitchen table—Games Done Quick began as a gaming competition in Mom’s basement. Now, thousands of people gather in person and hundreds of thousands stream from around the world to be part of the annual “speedrunning” gaming event, Awesome Games Done Quick, to raise funds for the Foundation.

We are proud to be part of this community that defies the odds, challenges expectations and continually breaks records.

The 2020 event received more than 54,000 donations from more than 80 different countries and raised a total of \$3.13 million for the Foundation.

Each year the generosity and kindness of the gaming community amazes us.

To date, Awesome Games Done Quick has raised more than \$14.4 million to fund research, technology transfer and community grants in the U.S. and around the world, and cancer prevention and early detection education and outreach.

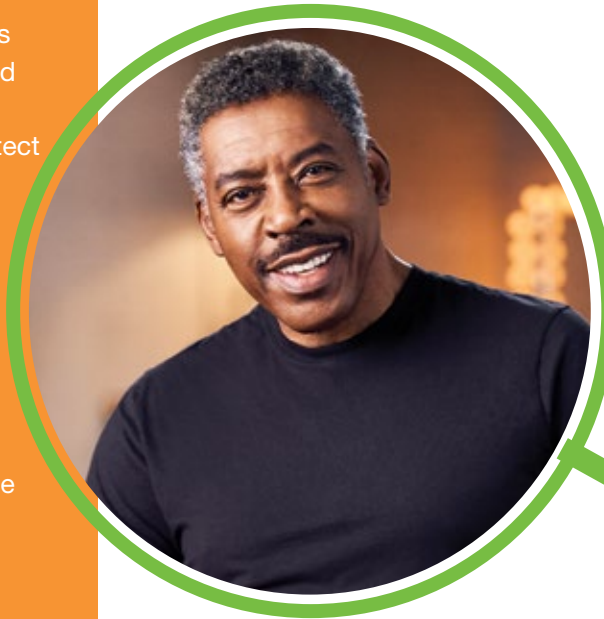

Thank you, Games Done Quick, for being our valued partner as we dare to imagine a world where no one dies of cancer.

Think About the Link®

This year the *Think About the Link* campaign teamed up with actor Ernie Hudson to share the message of the importance of the HPV vaccine to prevent at least six types of cancer. The human papillomavirus causes almost all cervical cancers and is also linked to vaginal, vulvar, penile, anal and oropharyngeal (back of throat) cancers. The HPV vaccine can protect against the virus to *Stop Cancer Before It Starts!*®

Mr. Hudson is best known for his role in the 1984 cult classic *Ghostbusters*, but he is also a cancer survivor. He was diagnosed with prostate cancer in 1998 and rectal cancer in 2011. In both cases, screening caught his cancer early and increased his likelihood of successful treatment. Mr. Hudson is now cancer-free and is spreading the word on the importance of getting the HPV vaccine to prevent cancer.

**THINK
ABOUT
THE LINK®**
Between Certain Viruses & Cancer
HPV · HEPATITIS B · HEPATITIS C

“It’s important to me that people know this issue is serious, but prevention is possible.”

—Ernie Hudson

Gut check: Young-onset colorectal cancer in your state

The Prevent Cancer Foundation recently issued a report to address the growing number of colorectal cancer cases in people under 50. The report, *Gut Check: Young-Onset Colorectal Cancer in Your State*, is a resource for members of Congress to raise awareness of young-onset colorectal cancer cases among their constituents. The report provides information about coverage mandates for screenings and the guidelines states use to develop insurance coverage requirements. Members of Congress can use its strategies to increase access to coverage in their states.

Tim Kavanagh, a comedian and auctioneer, shared his experience with young-onset colorectal cancer. He was diagnosed at age 50 with stage 2 rectal cancer after a routine colonoscopy.

Mr. Kavanagh said, **“I thought I was doing the right thing by having the procedure on time, but it was already too late.”**

Had Mr. Kavanagh been able to begin screening earlier, he could have caught his cancer at an earlier stage or prevented it completely. The U.S. Preventive Services Task Force (USPSTF), which determines coverage requirements for insurers under the Affordable Care Act, maintains routine screenings for those at average risk begin at age 50. But, after a consistent increase in young-onset cases since 1994, the American Cancer Society recently changed its guidelines to recommend screening at age 45 for those at average risk.

The report serves as a call to action for Congress to use their influence and platforms and urge the USPSTF to lower its recommended screening age to 45, which could save thousands of lives each year. By working with Congress, we hope the USPSTF will hear our call and enable patients to access the colorectal cancer screenings they need.

NOTE: *Gut Check: Young-Onset Colorectal Cancer in Your State* was created before the release of new draft guidelines on colorectal cancer screening from the U.S. Preventive Services Task Force in October 2020. At press time, the draft recommendations had not yet been finalized. The *Gut Check* report is currently being revised—visit www.preventcancer.org for an updated version.

Too Young for This Sh*t: Patrick's Story

In September 2017, just one month after getting married to his wife, Amanda, and returning from their honeymoon, Patrick Beauregard was diagnosed with stage 4 colorectal cancer.

The diagnosis had been a surprise to Patrick, who was 29 and healthy, and to all who knew him. "Cancer, at that point, was the last thing on my mind," he had said.

Patrick was part of a growing trend of Americans under the age of 50 who have been diagnosed with colorectal cancer. That's why the Prevent Cancer Foundation is telling young people across the U.S.: You may think you're Too Young for This Sh*t, but colorectal cancer is on the rise in younger adults.

The Foundation is spreading the word about signs and symptoms of the disease, how to be your own best advocate for your health, and the steps to take—at any age—to reduce your risk of colorectal cancer.

After several years of advocating with the Prevent Cancer Foundation and other organizations on young-onset colorectal cancer, Patrick died of the disease in September 2020, at age 32. The Foundation is committed to continuing our work on young-onset colorectal cancer in Patrick's memory.

You can learn more about Patrick's story and the Too Young for This Sh*t campaign at www.tooyoungforthis.org.

2020 Virtual Prevent Cancer Dialogue Webcast Series

The 2020 Prevent Cancer Dialogue was held as a three-part virtual webcast series that took place on June 17, June 24 and July 1, 2020. Each webcast included engaging presentations as part of moderated panels, Q&A with panelists, facilitated peer-to-peer conversations on trending topics and informative poster presentations.

Part 1: Cervical cancer and HPV

Speakers covered a range of topics including the potential for at-home screening for cervical cancer and how social media has affected communication about HPV vaccination.

Part 2: Innovative technologies to expand cancer screening

This segment highlighted exciting new technologies that could be used in medically underserved areas to screen for breast cancer, oral and oropharyngeal cancers, and cervical cancer.

Part 3: Challenges and opportunities for cancer prevention and screening in Indian Country

Speakers discussed the impact of the Affordable Care Act on Indian Country and how to connect with the community through educational outreach and initiatives.

“I liked the information on the advances in cancer screening and detection. The speakers and presenters were able to communicate their research and findings to a large audience and it still felt like being there physically.”

– Amaka Ikefuna, health educator

While the in-person event typically accommodates a few hundred people, our first-ever Virtual Dialogue had more than 2,000 attendees from around the world. People tuned in from 48 states, as well as Belize, Egypt, Germany, Ghana, Guam, India, Myanmar, Nigeria, Puerto Rico, Singapore, Switzerland, and United Arab Emirates.

Quantitative Imaging Workshop XVI:

Lung Cancer, COPD and Cardiovascular Disease—On the Cusp of Transformation

The 16th Quantitative Imaging Workshop, held October 10-11, 2019, explored how a revolution in biomedical imaging, which enables radiologists to detect the pathological process earlier than ever before, can be used to improve outcomes in managing early lung cancer. The goal was to introduce robust approaches to allow quantitative assessment of the growth of pulmonary nodules, as this is a sensitive and specific way to find early lung cancers.

KEY ISSUES:

Attendees discussed how often lung cancer screenings also produced findings consistent with COPD. There is a great need to determine the best approach to screening for early lung cancer, COPD and coronary calcification with the same image. This combined approach can greatly enhance the cost-effectiveness of screening.

LEADERSHIP AWARD: RESULTS:

Andrew C. von Eschenbach, M.D., accepted the James L. Mulshine, M.D., National Leadership Award in recognition of his foresight and leadership in securing funding and implementing the National Lung Screening Trial, which validated the lifesaving value of low-dose computed tomography (LDCT) over standard chest X-ray.

An article summarizing the Workshop was published in *Translational Medicine Communications* in October 2020.

Prevent Cancer

Virtual Gala – September 10, 2020

The Prevent Cancer Foundation's 26th Annual Gala, *The Kingdom of the Netherlands: A Virtual Masterpiece in Bloom*, took place on September 10, 2020, as a livestreamed virtual event. The evening was filled with exciting performances and inspiring stories.

VIEWED

More than 1,000 people viewed the virtual Gala.

SUPPORTED

One of the evening's most emotional moments came when Foundation board member Susanna Quinn shared the story of her triumph over ovarian cancer in a video featuring many of her friends, family and supporters.

HOSTED

Fox News National Security Correspondent and Foundation board member Jennifer Griffin stepped in at the last minute and was outstanding as the evening's master of ceremonies—the key role in weaving together a virtual experience for everyone at home to enjoy.

PERFORMED

The evening's pool of talent included notable musicians, actors, advocates and performers, including 311, Lauren Daigle, Alejandro Escovedo, Luis Guzmán, Ernie Hudson, Jeremy Ragsdale, Ali Rogin, Sheppard and Max Weinberg.

RAISED

The Virtual Gala raised \$1.56 million for Foundation programs— an INCREASE from the 2019 in-person event.

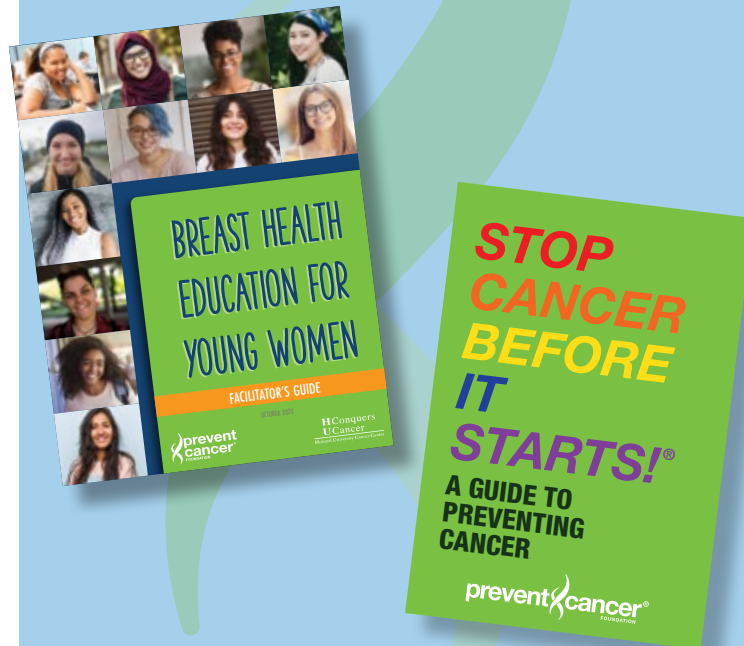

“Although we cannot meet in person, the Foundation’s mission is too important to cancel or postpone the Gala, so we carry on as best as we can, just like the longtime friends and partners we are.”

– His Excellency, the Ambassador of the Netherlands, André Haspels

The Prevent Cancer Foundation has updated its premier resources

Updated resources available now!

Breast Health Education for Young Women's Facilitator's Guide

This user-friendly education tool has been used in communities far and wide to reach young women with information about breast health and breast cancer. The Guide was developed to use in interactive group sessions—whether in person or virtual—and to encourage information-sharing with female relatives who are age-appropriate for screening.

Stop Cancer Before It Starts!® A Guide to Preventing Cancer

Research shows that up to 50% of cancer cases and about 50% of cancer deaths are preventable with the knowledge we have today.

This Guide is your one-stop shop for cancer prevention and early detection information. You can find clear information about ways to prevent cancer and a breakdown by cancer type of risk factors, risk-reducing behaviors, symptoms and treatment options.

Download these resources free of charge at www.preventcancer.org/breasthealthguide and www.preventcancer.org/guide. Spanish-language versions of the guides are currently being revised and will be available soon.

Foundation in the News

WSJ OPINION

Diagnoses of the State of Cancer Treatments

A solid approach to early cancer detection could include focusing on individuals who have the highest genetic predisposition to particular cancer types with the longest lead times to diagnosis.

Dr. Dean's focus on cancer prevention and early detection is a step in the right direction. It is urgent, however, that certain developments in recent years cause for much more optimism than the optimism, particularly with respect to the early detection of lung cancer.

The data that three randomized trials failed to show a reduction in lung cancer deaths from screening in midland. While these small, targeted trials focused on benefits of screening, they had major limitations and some of significant duration. These much larger trials did show a significant reduction in mortality among high-risk individuals when a low-dose CT scan was compared to a chest X-ray. The National Lung Screening Trial, which concluded in 2011, proved that low-dose CT screening can reduce lung-cancer deaths by at least 20%. This trial involved in the U.S. Preventive Services Task Force recommending lung-cancer screening for high-risk individuals. These findings were validated by the later NLST study in the Netherlands, which showed a larger reduction in lung-cancer deaths from low-dose CT screening (20% in men and up to 45% in women). The third large trial was conducted in Mexico; it also demonstrated a significant mortality reduction benefit.

Future of Personal Health

It's Time to Get Cancer Screenings Back on the Books

More people have understandably delayed their regularly scheduled cancer screenings during the pandemic, but the time has come to get these important preventive tests back on the books.

For 40 years, the **Prevent Cancer Foundation** has encouraged routine cancer screenings as an essential tool in preventing cancer or detecting it early, when successful treatment is more likely. We know screening saves lives, which is why it's a central focus of our work.

It can be challenging for people to prioritize preventive and early detection in the best of times. But we never would've predicted that cancer would bring us a pandemic. Further challenging

The Vaccine That Could Eradicate Cervical Cancer

Carolee Millip
 Founder and CEO, Prevent Cancer Foundation

The human papillomavirus (HPV) is a very common virus, nearly 80 million people (about one in two) are currently infected in the United States. It is estimated that nearly all sexually active men and women get one of the many types of the virus at some point.

WSJ OPINION

People 'afraid to go to doctors': A third of Americans miss cancer screenings, survey suggests

A recent survey suggests more than a third of Americans have missed scheduled cancer screenings because of COVID-19 risk, increasing health inequity when there may be another fatal consequence of the coronavirus pandemic.

Prevent Cancer Foundation released survey results of more than 1,000 respondents that found about 33% of Americans have missed routine cancer screenings due to COVID-19 fears. Additionally, 49% of Americans have missed appointments.

"The survey shows that, in the wake of the pandemic, people are afraid to go to their doctors... What we need everyone to know is that making appointments puts you at much higher risk for various health issues," said Carolee "The" Millip, Founder and CEO of the Prevent Cancer Foundation.

newsmax health

The Link Between Viruses and Cancer

By Lynn Allison | Fri, 22 November 2020 10:34 AM

In cancer contagious? Not in the power sense, but the fact of the matter is that viruses, which are contagious, can lead to tens of thousands of cancer cases. And these cancers can be mostly avoided with available vaccines and screening, says Carolee Millip, founder of the Prevent Cancer Foundation, an organization dedicated to preventing the deadliest disease.

WSJ OPINION

Don't Let Covid-19 Delay Your Own Cancer Screening

Even though the coronavirus and other health concerns have delayed and derailed cancer screenings, people should not let their fears prevent them from getting the care they need.

Carolee Millip, founder and CEO of the Prevent Cancer Foundation, says that while the pandemic has delayed many cancer screenings, it is not a reason to stop. "The pandemic has delayed many cancer screenings, but it is not a reason to stop. The pandemic has delayed many cancer screenings, but it is not a reason to stop."

Prevent Cancer Foundation Benefits Global Cancer Research

2020 Funds Raised in Record-Breaking Gaming Marathon

The gaming community showed their support for the foundation by donating proceeds throughout a 24-hour marathon of a week-long, live, online gaming event. The charity event, **2020 Funds Raised in Record-Breaking Gaming Marathon**, was held on January 10, 2021, raising a total of \$1.2 million, the most in the 10-year history, with the event being hosted by the Prevent Cancer Foundation.

Each year, the gaming group, **ACTG**, has raised hundreds of thousands of dollars to fund cancer research, education, and community programs. This year's event featured hundreds of people attending in person and thousands of thousands logging in online through Twitch, a live-streaming platform for gaming.

Kate Young, Director of Education

As a person supporting the Prevent Cancer Foundation, ACTG has raised more than \$1.2 million to fund research, education, and community programs both in the United States and internationally, as well as cancer prevention and early detection education and research. This year, over 10,000 donations were received from more than 40 different countries.

"It has been an incredible honor to be a part of the growth of the Games Done Quick community. With their support, the Foundation is able to fund life-saving research and education to cancer prevention and early detection," said Judy Hayes, MEd, Executive Vice President of the Prevent Cancer Foundation.

A special "good" will be held during the charity event highlighting some of the innovative research and funding projects that are being funded by the Prevent Cancer Foundation's Games Done Quick event.

Cancer Now!

Genomics and COVID-19: What People With Cancer Need to Know

More than 100 million people have been infected with COVID-19 since it was first identified in late 2019. As of early 2021, more than 5 million people have died from the disease. While the majority of people who have died from COVID-19 were over the age of 65, many people under the age of 65 have died from the disease. People with cancer are at a higher risk of dying from COVID-19.

Genomics and COVID-19: What People With Cancer Need to Know

More than 100 million people have been infected with COVID-19 since it was first identified in late 2019. As of early 2021, more than 5 million people have died from the disease. While the majority of people who have died from COVID-19 were over the age of 65, many people under the age of 65 have died from the disease. People with cancer are at a higher risk of dying from COVID-19.

Back on the Books Initiative Launched to Aid in Rescheduling Cancer Screening Appointments

The **Back on the Books Initiative** is a free, online service that helps people reschedule their cancer screening appointments. The service is available in multiple languages and is accessible 24/7. The service is available in multiple languages and is accessible 24/7.

preventGEN

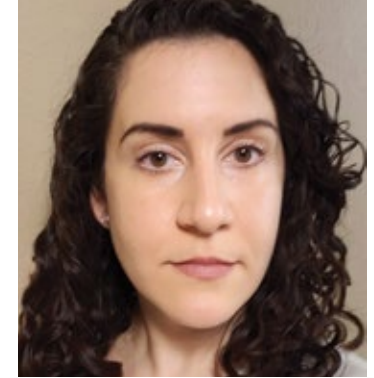

In 2019, the Prevent Cancer Foundation created preventGEN, an advisory committee that focuses on cancer prevention from the perspective of younger generations.

CHAIRMAN

David S. Alberts, M.D.

Director Emeritus, University of Arizona Cancer Center, Retired Regents Professor of Medicine, Pharmacology, Nutritional Sciences, Public Health and BIO5
The University of Arizona College of Medicine

Jasjit S. Ahluwalia, M.D., M.P.H, M.S.

Professor, Brown University School of Public Health

Bart Barlogie, M.D., Ph.D.

Professor of Medicine, Hematology and Medical Oncology, Retired, Ichan School of Medicine, Mount Sinai Medical Center

Monica M. Bertagnoli, M.D., FACS, FASCO

Group Chair, Alliance for Clinical Trials in Oncology; Professor of Surgery, Harvard Medical School; Associate Surgeon, Brigham and Women's Hospital and Dana-Farber Cancer Institute

Rachel F. Brem, M.D., F.A.C.R., F.S.B.I.

Director, Breast Imaging and Interventional Center; Professor and Vice-Chair, Program Leader, Breast Cancer, the George Washington Cancer Center

Paul A. Bunn Jr., M.D.

Professor, James Dudley Chair in Cancer Research, University of Colorado Denver School of Medicine, Division of Medical Oncology

Sigrid Carlsson, M.D., Ph.D., M.P.H.

Assistant Attending Epidemiologist, Memorial Sloan Kettering Cancer Center

Kenneth H. Cowan, M.D., Ph.D.

Director, Fred and Pamela Buffett Cancer Center, University of Nebraska Medical Center

Riccardo Dalla-Favera, M.D.

Director, Institute for Cancer Genetics, Irving Cancer Research Center, Columbia University Medical Center

William S. Dalton, M.D., Ph.D.

Founder & Executive Chair, M2Gen

Andrew Dannenberg, M.D.

Henry R. Erle, M.D. – Roberts Family Professor of Medicine, Associate Director of Cancer Prevention, The Sandra and Edward Meyer Cancer Center, Weill Cornell Medicine

Raymond N. DuBois, M.D. Ph.D.

Dean, College of Medicine, Medical University of South Carolina

H. Shelton (Shelley) Earp III, M.D.

Director, Lineberger Comprehensive Cancer Center, University of North Carolina

Stephen B. Edge, M.D., FACS, FASCO

Vice President, Healthcare Outcomes and Policy, Roswell Park Cancer Institute

Margaret Foti, Ph.D., M.D., (h.c.)

Chief Executive Officer, American Association for Cancer Research (AACR)

Harold P. Freeman, M.D.

Chairman Emeritus and Founder, Ralph Lauren Center for Cancer Care and Prevention

Patricia A. Ganz, M.D.

Distinguished Professor Health Policy & Management and Medicine, UCLA Fielding School of Public Health, David Geffen School of Medicine at UCLA; Director, Cancer Prevention & Control Research, Jonsson Comprehensive Cancer Center

David M. Gershenson, M.D.

Professor, Department of Gynecologic Oncology & Reproductive Medicine, The University of Texas MD Anderson Cancer Center

Edward Giovannucci, M.D., Sc.D.

Professor of Nutrition and Epidemiology, Harvard T.H. Chan School of Public Health

Anna R. Giuliano, Ph.D.

Professor and Director of the Center for Immunization and Infection Research in Cancer, H. Lee Moffitt Cancer Center and Research Institute

Gary E. Goodman, M.D., M.S.

Staff Oncologist/Joint Member, Swedish Cancer Institute, Fred Hutchinson Cancer Research Center

Garth Graham, M.D., M.P.H.

President, Aetna Foundation

Stanley R. Hamilton, M.D.

Professor and Head, Division of Pathology and Laboratory Medicine, The University of Texas MD Anderson Cancer Center

Claudia Henschke, Ph.D., M.D.

Professor of Radiology, Department of Radiology, Icahn School of Medicine at Mount Sinai

Elmer E. Huerta, M.D., M.P.H.

Director, Cancer Preventorium, Washington Cancer Institute, Washington Hospital Center

Derek M. Huffman, Ph.D.

Associate Professor of Molecular Pharmacology and Medicine, Institute for Aging Research, Co-Director: CEAC Core, Albert Einstein College of Medicine

Lovell A. Jones, Ph.D., F.H.D.R

Adjunct Professor, Department of Health Promotion & Community Health Sciences, Texas A&M University School of Public Health (TAMSPH); Research Faculty, College of Science & Engineering Texas A&M University Corpus Christi; Professor Emeritus, University of Texas Distinguished Teaching Professor, University of Texas M.D. Anderson Cancer Center; Professor Emeritus, University of Texas Graduate School of Biomedical Sciences

Karen E. Kim, M.D., M.S.

Office of Community Engagement and Cancer Disparities, University of Chicago

T. Peter Kingham, M.D., FACS

Associate Attending Surgeon, Hepatopancreatobiliary Service, Department of Surgery, Director, Global Cancer Disparity Initiatives, Memorial Sloan Kettering Cancer Center

Dr. Ann & Just Wellness, LLC

Charles ("Chip") Landen, Jr., M.D., M.S.

Associate Professor, University of Virginia Health System, University of Virginia

Bernard Levin, M.D.

Professor Emeritus, The University of Texas MD Anderson Cancer Center

Marc E. Lippman, M.D.

Professor of Oncology and Medicine, Georgetown Lombardi Comprehensive Cancer Center

Scott M. Lippman, M.D.

Distinguished Professor of Medicine, Senior Associate Dean and Associate Vice Chancellor for Cancer Research and Care, Chugai Pharmaceutical Chair in Cancer, University of California, San Diego

Scientific Review Panel

Patrick J. Loehrer, Sr., M.D.

Director, Indiana University, Melvin and Bren Simon Cancer Center, Indiana University

John L. Marshall, M.D.

Professor of Medicine, Chief, Division of Hematology and Oncology, MedStar Georgetown University Hospital; Director, Ruesch Center for the Cure of GI Cancers; Professor of Medicine and Oncology, Lombardi Comprehensive Cancer Center

Elena Martinez, M.P.H., Ph.D.

Professor of Family and Preventive Medicine, Moores Cancer Center, University of California, San Diego

Bernard Levin, M.D. (Co-Chair)

(Co-Chair) Professor Emeritus, University of Texas MD Anderson Cancer Center

James L. Mulshine, M.D. (Co-Chair)

Professor, Rush Medical College, Rush University Armour Academic Center

Christopher Albanese, Ph.D.

Professor of Oncology and Pathology, Director, Preclinical Imaging Research Laboratory (PIRL), Executive Director, Center for Translational Imaging (CTI), Lombardi Comprehensive Cancer Center, Georgetown University

Rebecca Ashare, Ph.D.

Associate Professor, Department of Psychiatry, Center for Interdisciplinary Research on Nicotine Addiction, Senior Fellow, Center for Public Health Initiatives, Perelman School of Medicine at the University of Pennsylvania

Janet Audrain-McGovern, Ph.D.

Professor, Department of Psychiatry, Perelman School of Medicine, University of Pennsylvania

David Berrigan, Ph.D., M.P.H.*

Behavioral Research Program, Division of Cancer Control and Population Sciences, National Cancer Institute

**Dr. Berrigan is serving in his personal capacity.*

Robert Clarke, Ph.D., D.Sc.

Executive Director, Hormel Institute, University of Minnesota

Nancy Emenaker, Ph.D., M.Ed., R.D.N., L.D., F.A.N.D.

Program Director, Nutritional Science Research Group, Division of Cancer Prevention, National Cancer Institute

Stanley Thomas Fricke, Nucl. Eng., Ph.D.

Professor of Radiology and Director of Medical Physics, Georgetown University Medical Center

Leena Hilakivi-Clarke, Ph.D.

Professor of Food Science and Nutrition, Leader of Women's Health Section, Hormel Institute, University of Minnesota

Stephen Hursting, Ph.D., M.P.H.

AICR/WCRF Distinguished Professor, Department of Nutrition, Nutrition Research Institute, Lineberger Comprehensive Cancer Center

Brian Lehmann, Ph.D.

Research Assistant Professor, Vanderbilt-Ingram Cancer Center, Vanderbilt University

Mary Beth Martin, Ph.D.

Professor, Departments of Oncology, Biochemistry and Molecular Biology, Lombardi Comprehensive Cancer Center, Georgetown University Medical Center

Pierre P. Massion, M.D.

Professor of Medicine, Division of Allergy, Pulmonary and Critical Care Medicine, Vanderbilt Ingram Cancer Center

Carola Neumann, M.D.

Associate Professor, Department of Pharmacology and Chemical Biology, Magee-Women's Research Institute, UPMC Hillman Cancer Center

Rajasha Rupaimoole, Ph.D.

Scientist II, Precision Molecular Oncology, Cancer Biology, Bayer Research & Innovation Center, Tufts Launchpad Biolabs

Marc D. Schwartz, Ph.D.

Professor, Oncology, Georgetown University School of Medicine, Associate Director for Population Science, Georgetown Lombardi Comprehensive Cancer, Co-Director, Jess and Mildred Fisher Center for Hereditary Cancer and Clinical Genomics Research

Peter G. Shields, M.D.

Deputy Director, Comprehensive Care Center, Professor, College of Medicine, Julius F. Stone Chairman in Cancer Research, James Cancer Hospital, The Ohio State University Wexner Medical Center

Andrew G. Sikora, MD, Ph.D.

Professor of Surgery, Director of Research, Department of Head and Neck Surgery, The University of Texas MD Anderson Cancer Center

Kenneth D. Tew, Ph.D., D.Sc.

Chairman Department of Cell & Molecular Pharmacology, John C. West Chair in Cancer Research, Medical University of South Carolina

Danyelle M. Townsend, Ph.D.

Associate Professor, Department of Drug Discovery and Biomedical Sciences, Director, Analytical Redox Biochemistry, Medical University of South Carolina

Bruce J. Trock, Ph.D.

Director, Division of Epidemiology, Brady Urological Institute; Frank Hinman, Jr. Professor of Urology, Professor of Urology and Oncology, Johns Hopkins University School of Medicine

Kent E. Vrana, Ph.D.

Elliot S. Vesell Professor, Chair, Department of Pharmacology, Penn State College of Medicine

Zhen Zhang, Ph.D.

Associate Professor, Department of Pathology and Oncology, Johns Hopkins Medical Institutions

Looking ahead: a future without cancer.

*The call comes from your mother. Your best friend.
Your brother. Your child. Your doctor.*

The call that changes everything: CANCER.

Chances are, you or someone you love has been affected by cancer.

Every year, 1.8 million Americans are diagnosed with cancer. More than 600,000 people die of the disease annually.

Now imagine a world where you don't have to fear that call. Imagine if cancer could always be detected early enough to be successfully treated.

Imagine a world where no one dies of cancer.

The Prevent Cancer Foundation dares to imagine that world.

The Foundation is rising to meet the challenge of reducing cancer deaths by 40% by 2035. To achieve this, we are committed to saving lives across all populations by investing:

- **\$20 million** in innovative research and technologies to detect cancer early and advance multi-cancer screening.
- **\$10 million** to expand cancer screening and vaccination access to medically underserved communities, bringing hope to those who lack access due to financial, logistical and cultural obstacles.
- **\$10 million** to educate the public about screening and vaccination options—ensuring everyone, everywhere understands the importance of these opportunities to help lead long, healthy lives.

Donor Spotlights

The Stohlman Family

Like many families around the world, the Stohlman family has been profoundly touched by cancer. With three generations of their family affected by this deadly disease, they wanted to do something about it.

The Stohlmans chose to support the Prevent Cancer Foundation to help others prevent cancer or detect it early. Since 1996, they have given to the Foundation in nearly every way, including funding a full research grant for breast cancer research, supporting the Annual Spring Gala and the Health Fair and 5k Walk/Run, and making annual donations. Even the kids in the family, RJ and Lizzie, got in on the action by hosting a lemonade stand to raise money for the Foundation!

The Prevent Cancer Foundation gives our sincere thanks to the Stohlman family for more than 25 years of support to *Stop Cancer Before It Starts!*[®]

“ As we know all too well, there’s hardly a family that isn’t touched by cancer. But most families don’t respond the way the Stohlmans have done over a quarter of a century, by supporting the Prevent Cancer Foundation’s events and programs, and helping save lives through cancer prevention and early detection. We could not be more grateful. ”

— Carolyn Aldigé, Founder and CEO, Prevent Cancer Foundation

Alexine and Aaron “Jack” Jackson

The Jacksons have always given generously in support of the Foundation’s annual events, including the Annual Spring Gala. The mission is personal: Ms. Alexine Jackson is a breast cancer survivor of more than 20 years, and Dr. “Jack” Jackson died from prostate cancer after a half-century career as a physician, teacher and surgeon at Howard University Hospital.

Ms. Jackson was introduced to the Foundation in 1989, when she served as the national president of the YWCA of the USA. The Foundation and the “YW” collaborated on our first outreach program, Project Awareness. Ms. Jackson joined our board in 1995.

After Dr. Jackson’s death, Ms. Jackson’s dedication to the Foundation remained steadfast. She continues to support our work through her role as an emeritus member of the Foundation’s Board of Directors—we are so grateful for her generosity and service.

Jennifer Griffin and Susanna Quinn

Talk about a dynamic duo. When Fox News correspondent Jennifer Griffin teamed up with her friend, entrepreneur Susanna Quinn, they became a force to be reckoned with.

Each has dealt with a cancer. Ms. Griffin was diagnosed with stage 3 triple negative breast cancer in 2009, and Susanna Quinn with stage 3 ovarian cancer in 2019. With huge networks of supporters and influencers, they knew they could use their experiences to help the Foundation save lives.

“I don’t want to be a worrier—I want to be a warrior!”

Ms. Quinn said.

Ms. Griffin and Ms. Quinn have joined the Prevent Cancer Foundation Board of Directors and are currently tackling their first fundraiser, a popup holiday shop, as board members and ambassadors of the Foundation.

Join us
**in advancing cancer
prevention and
early detection.**

**We dare to imagine a world
where people don't die of cancer.
Do you?**

Over the past 35 years, each gift from a supporter has helped realize our mission of cancer prevention and early detection through research, education, outreach and advocacy.

Through your generosity, we can achieve our goal of reducing cancer deaths by 40% by 2035, our 50th anniversary. Your support today will help us continue to save lives across all populations through cancer prevention and early detection.

Do you dare to imagine a world where no one dies of cancer? Here are some ways to support this vision today:

- **Give monthly:** Recurring gifts provide the Foundation with consistent and reliable funds to save lives.
- **Make a direct donation:** Every dollar or share of stock you give furthers our vision and mission.
- **Celebrate a loved one:** Pay tribute in honor or in memory of someone dear to you by helping others.
- **Plan a gift:** Support prevention and early detection for generations to come by including the Foundation in your will, trust or estate plans.
- **Give at work:** Donate with a payroll deduction through the Combined Federal Campaign (#CFC 11074).
- **Sponsor an event:** Join us in Washington, D.C. for our Annual Gala or Health Fair and 5k Walk/Run. Or host your own event (golf tournament, video game marathon, silent auction, casino night) with friends to raise money.

2020 Donor Honor Roll

THE EDWARD PERRY RICHARDSON LEGACY SOCIETY

Edward Perry Richardson was the father of Carolyn R. Aldigé, founder and CEO of the Prevent Cancer Foundation. His struggle against cancer inspired her to establish the organization and his memory has sustained the Foundation's mission of saving lives across all populations through cancer prevention and early detection. Members of the *Edward Perry Richardson Legacy Society* are special friends of the Prevent Cancer Foundation who have committed to ensuring the legacy of the Foundation by naming it as a beneficiary in their will, charitable gift annuity, charitable trust, individual retirement account or life insurance policy, or have made a gift of real estate or tangible personal property.

MEMORIAL AND HONOR TRIBUTES

These tributes are special ways to honor friends, loved ones and colleagues. Honor gifts often mark a special occasion like Mother's or Father's Day, bar/bat mitzvahs or a birthday. Many couples also designate the Prevent Cancer Foundation as a recipient of contributions in lieu of wedding or shower gifts. In return, the Foundation sends a card acknowledging these thoughtful donations.

HONOR TRIBUTES

Mrs. Carolyn Aldigé
Mr. Jeff Alper
Ms. Jill Bonney
Ms. Marcia Carlucci
Mr. Joseph Chowning
